

May 11, 2009

E-Verify for Federal Contractors - September 8, 2009, has been announced as the new effective date for rules implementing Executive Order 12989 requiring federal contractors to verify the work authorization of all employees through E-Verify. Any federal contractor awarded a new contract after that date that has a Federal Acquisition (FAR) E-Verify clause will have to use E-Verify to ascertain the current work authorization of all employees (new and existing). Federal contractors may not use the E-Verify system for current employees until after September 8, 2009, and they are awarded a contract with the E-Verify clause.
